

Davy Driver loves motoring but wants to reduce his carbon emissions. Can you write down some tips for him?

Some possible answers are upside down below:

1. Drive a bit more slowly to save fuel 2. Share journeys with other people 3. Walk wherever possible 4. Choose a car with a smaller engine 5. Buy a hybrid car that uses less petrol 6. Pump up the tyres to the right pressure 7. Keep the car well serviced - especially the exhaust system
